Summer Term

Welcome Back

It is lovely to see all the children back in school and settling in to school life.

We are looking forward to doing a lot more outdoor learning as the weather starts to get brighter.

We have some lovely curriculum topics that the children will be learning about.

We will also be hoping to go on some trips in the summer term to support our learning.

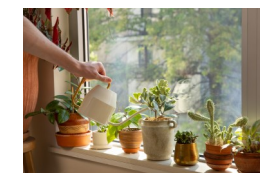

Library books are chosen on a Monday to share at home and must be returned by Friday, ready for the children to choose a new one for the following week.

Curriculum

This term we will be exploring many different topics:

In Science we will be learning about plants and what they require to survive. We will also be learning about different plants and flowers and making art with them.

In DT we will be trying foods from different cultures and learning about healthy foods to include when making our own salads.

In Geography we will be looking at how temperature changes.

We will be using thermometer to check the temperature in different places and learn how to record and compare our findings.

Our text this term is:

The Bog Baby
